

UnCommon connectivity

Introducing the Commonwealth Worldwide Desktop “RezTracker”

First we launched our “CWW Mobile” App for your phone. Now we’re giving our clients, especially ground transportation coordinators, even more functionality right on your desktop!

You will now be able to:

- **Track Your Vehicle(s) in Real Time** – see exactly where your car is via GPS mapping. (Please note that GPS tracking is available in select major markets. See our website for an up-to-date list.)
- **Real Time Traffic, Flight Tracking & Weather** – one-click access to view the exact status of each of your active trips.
- **Email Live Map Links** – keep those who need to know up to date with one-time secure links to GPS tracking that will expire when the trip is complete.
- **Trip List** – view all of the details of your upcoming trips, including current itinerary and reservation information.

• **Make a Reservation** – book a trip anywhere around the world.

• **View Your Receipts** – review your final charges from all of your past or recently completed trips.

Just contact us to set up access to this web-based application for your computer. All you need is a browser to use it!
